## **FOREWORD**

Prediction is the chief objective of Predictive Astrology. A learned astrologer has to make study of the three different parts of a horoscope - 1. Yoga, the combination of planets and Lords, 2. Period-sub-period i.e. dasha, 3. Gochar that is, transit. All the three parts are the supplements of each other. Yoga is the most important among all the three parts. Period-sub-period i.e. dasha may prove to be futile if there is no Yoga in a horoscope. For example, Period-sub-period cannot bless a native with a child if there is no Santan Yoga in his horoscope. Dasha might be of Lord of fifth house or of Karaka planet. Likewise, Gochar too cannot do anything if there is no Yoga in a horoscope. So, all the three parts are essential to have the result.

In the book, I have tried to put what I have learnt by experience. My views might not be approved of the scriptures, but it does not mean that the scriptures are wrong or erroneous. I do respect all the rules mentioned in the scriptures. But experience has got its own importance. For example, according to the scriptures, exalted planets render benefic results. But in practical life, it has been experienced that the said planets prove to be unable in rendering favorable results. Take one more example. In winter, Sun proves to be pleasing, whereas the same Sun is scorching in summer when it is exalted. It is the need of the hour to ponder over the matter afresh. Learned astrologers should express their views in black and white, which will be beneficial for the society we live in.

In the book a study of only one of the said three parts has been mentioned and that is vimshottari dasha. Maharshi Parashar has mentioned 43 Dashas in his "Brahat Parashar Hora Shastra." But here in this book the Vimshottari Dasha has been mentioned elaborately in particular, which is used extensively. Besides, the Ashtottari and Yogini Dashas have also been narrated briefly.

The book has been composed keeping in view the problems of the students of All India Federation of Astrologers' Societies on the inspiration of Mr. Arun Kumar Bansal, President of the Federation. It has also been kept in view that the book may prove to be useful for the other students of Astrology. It is up to the students to decide how far I have been successful in composing the same.

## **Chapter-1**

# **Period: An analysis**

The soul is immortal. It moves on from body to body and thus the cycle of life and death keeps going on. The soul becomes active despite being inactive, dependent despite being independent and limited despite being omnipresent soon after it enters into a new body. It also feels happiness and sorrow though it is passionless and immutable. All these deformations are indicated in the horoscope of a native at the time of his birth. The bondages resulting from one's deeds (Karmaanubandhans) are shown by the Yogas in a horoscope. The Period shows as to when the results of Yogas will come out. The Vimshottari Dasha is the main among all the dashas.

The main Period of a planet is called Major period. In Major period its division is called Sub period. Division of Sub-period is called Pratyantardasha, Updasha or Vidasha. Further the division of Pratyantardasha is called Sookshmadasha or Faldastra. The division of Sookshmadasha is called Pranadasha. Thus the Major period can be divided up to Pranadasha with which the time can be calculated up to Pranadasha. The lord of Major period is called Mahadashanath. The lord of sub-period is called Antardasha nath.

**Vimshottari Dasha :** It is also known as Nakshatra dasha.

The maximum limit of life is 120 years in this Dasha. This period of 120 years has been divided into Period years of the planets and they (the planets) have been kept in the following order.

- Period of Sun 6 years
- Period of Moon 10 years
- Period of Mars 7 years
- Period of Rahu 18 years
- Period of Jupiter 16 years
- Period of Saturn 19 years
- Period of Mercury 17 years
- Period of Ketu 7 years
- Period of Venus 20 years

This Period can be calculated according to the birth star of a native in the following manner.

	Krit	Rohi.	Mrig.	Adra	Punar	Push	Ashl.	Magha	P.Fal.
Jnm.Nksh.	U.Fal.	Hast	Chitra	Swati	Vish.	Anur.	Jyes.	Moola	P.Asha.
	U.Asha.	, Shra.	Dhan.	Shat.	P.Bhdr.	U.Bhdr.	Rev.	Ashw.	Bhar.
D'nath	Sun	Moon	Mars.	Rah.	Jup.	Sat.	Merc.	Ketu	Ven.
DVarsha	6	10	7	18	16	19	17	7	20

### Method of Period processing (Sadhana):

The constellation in which the Moon happens to be posited at the time of birth of a native, is called birth star i.e. Janma Nakshatra. First, a counting from Krittika constellation to birth star is made and then the sum total is divided by 9. Remainder is kept as shown in the above table. Major period happens to be of the planet, which comes to be known after counting.

For example, a native was born in Anuradha constellation. It comes to be 15 after counting from krittika. (If counted from krittika, Anuradha falls on 15). Now, if 15 is divided by 9, 6 is the remainder. Saturn falls on the sixth place from Sun after counting. So, it is Major period of Saturn.

### Drawing out the Bhukti and Bhogya period

Planets are moving, so each planet has its own degrees i.e. longitude. To calculate the remaining period of a planet i.e. Bhogya Dasha, we take the longitude of Moon and see on which nakshatra she is posited and. It is also observed that how many degrees it has gone ahead in the constellation (calculation of a planet is made according to the placement and transit of it on a constellation by degrees). The measure of a constellation is  $13^{\circ}20'$  i.e. 800 minute. An example can be cited to make it clear. Suppose that the Moon is at 3 Rashi  $9^{\circ}00$ . According to constellation calculation, the Moon is in Pushya constellation and Saturn is the lord of Pushya constellation. Therefore, it will be the Saturn Period of the native at the time of his birth. Pushya constellation starts from  $3^{\circ}-20$  and remains upto  $16^{\circ}-40$ .

Longitude of Moon =  $9.00$  Cancer Pushya Nakshatra starts from  $3^{\circ}-20$  the Moon has travelled in Pushya Nakshatra  $9^{\circ}-0-3^{\circ}-20=5-40$

To calculate the remaining period of a planet i.e. Bhogya dasha, we take the period of the Janma nakshatra planet in our case it is Saturn whose period is 19 years. The measure of each nakshatra is  $13^{\circ} 20'$  i.e. 800 minutes. Suppose at the time of birth Moon is in Cancer sign, Pushya nakshatra at  $9^{\circ}$  longitude.

The Moon has transited  $5^{\circ} 40'$  of Pushya constellation. The remaining period of Saturn can be learnt by these Bhogya degrees.

### **Example:**

If the phase of constellation is  $13^{\circ} 20' / 800$  minutes, then the Period of Saturn = 19

$$\begin{array}{r} \text{If it is 1 minute} \\ \hline 19 \\ 800 \end{array}$$

$$\begin{array}{r} \text{If it is } 5^{\circ} 40' \text{ i.e. 340 minutes then the Period} \\ \frac{19 \times 340}{800} = 8.075 \end{array}$$

$\therefore$  the Moon has travelled = 8 yr. 00 m. 27 days

Remaining period to be travelled = 19 yrs / 8 hrs - 0m 27day = 10yr-11M- 3 Day.

The remaining part thus drawn is added to the date of birth and thus the termination-period of Dasha nath is brought in. After this the Period of planets is added turn by turn.

### **Sub period:**

Every planet has the Sub period of all the nine planets in its Major period. The first Sub period is that of lord of Major period. For example, the first Sub period in the Major period of the Sun will be of its own. Rest of the Sub periods will be there placed serial wise. Take an example of the Sun. In the Major period of Sun the first Sub period will be of its own, the second of Moon, third of Mars, fourth of Rahu, fifth of Jupiter, sixth of Saturn, seventh of Mercury, eighth of Ketu and ninth will be that of Venus. The placement of Sub periods of all the other planets in their Major periods will be the same way.

### **Measurement of Sub period**

It is very easy to draw out the measurement of an Sub period. We know that how many years have been provided to a planet in 120 years. The Sub period of a planet is drawn out by unit method. Let us take an example of Saturn who has been provided 19 years in 120 years.

$$\begin{array}{r} \text{In 120 years Saturn has} \\ = 19 \end{array}$$

$$\begin{array}{r} \text{19 years Saturn has} \\ \frac{19}{120} \end{array}$$

$$\begin{aligned} \text{In 19 years Saturn has } & \frac{19 \times 19}{120} \\ & = 3.008 \text{ years} \end{aligned}$$

i.e. = 3 years - 00 Month - 03 Days.  
 $= .008 \times 12 \text{ month} = .096 \times 12 \text{ month} = 00 \text{ month}$   
 $= .096 \times 30 \text{ days} = 2.880 \text{ days}$   
 $= 3 \text{ days}$

i.e.  $\frac{\text{Mahadasha nath} \times \text{Antardasha nath}}{120} = \text{years}$

$$\frac{\text{Mahadasha nath} \times \text{Antardasha nath}}{10} = \text{month}$$

We can draw out the Pratyantardasha of planets on the basis of the above rules.

### Pratyantardasha Sadhan

Every planet has Pratyantardasha of nine planets in its Sub period like that it has Sub periods of the planets in its Period. The first Pratyantardasha in the Sub period of a planet is that of Antardasha nath. The rest of the Pratyantardashas move on serially. Suppose that we have to draw out the measurement of the Pratyantardasha of Saturn Measure of Saturn in 120 years = 19

$$= \frac{19}{120}$$

3.008 (Measure of Sub period)

$$\begin{aligned} & = \frac{19 \times 3.008}{120} \\ & = 0.4763 \end{aligned}$$

i.e. 0 year 5 months 21 days 11.4 hours

$$\frac{\text{Mahadasha nath} \times \text{Antardasha nath} \times \text{Pratyantar Dasha nath}}{120 \times 120} = (M) \times 30 (D)$$

$$\frac{\text{Mahadasha natha} \times \text{Antardasha nath} \times \text{Pratyantar Dasha nath}}{40} = \text{Day}$$

## ***Chapter-2***

# **Horoscope**

**There are three elements in a horoscope**

1. House
2. Signs
3. Planets

We suppose that the native knows the elements of the house and sign if he wants to study the period-sub-period. The period-sub-period happens to be of i.e. dasha planets. We shall, therefore, be making a study primarily of period-sub-period.

### **Benefic and malefic planets**

Planets generally give two types of results - benefic and malefic. The planets giving benefic results are naturally considered to be benefic ones whereas those giving malefic results are malefic planets. We shall have to study both the benefic and malefic ones. Benefic planets are those who make our mind happy & peaceful whereas malefic ones cause distress. Suppose, I am getting my daughter married. I have to spend much in it but I am happy. I am happy and peaceful despite spending my money so the occasion is auspicious for me.

On the other hand, my father died and I got an amount of Rupees 10 lacs from insurance as its outcome. I am sad though I am getting money from somewhere. So, this is an inauspicious occasion for me. According to the Parashar rules, good and evil effects of a planet depend on the happy or sad stage of mind. Jupiter and Venus are the natural benefic planets. The Moon in Paksha Bala and Mercury conjoined with or aspected by a benefic planet are also benefic planets.

Moon remains strong from Shukla Paksha Ekadashi to Krishna Paksha Panchami. This strong Moon is considered to be benefic. Moon remains weak from Krishna Paksha Ekadashi to Shukla Paksha Panchami. This weak Moon is said to be malefic. Again, the Moon remains some what strong between Shukla Paksha Shashthi to Dashmi of Shukla Paksh and the Moon is weak between Krishna Paksha Shashthi to Shukla paksh Panchami. This Moon is said to be mean strong and gives mixed results. The

Moon is not considered to be malefic if it is debilitated i.e. it is situated in Scorpio. Sun, Mars, Saturn, Rahu and Ketu are said to be malefic planets in descending order. Apart from these, debilitated strong Moon and Mercury conjoined with or aspected by a malefic planet, also and posited in between malefic planets.

**Lagna Kundali**

**Navamsha Horoscope**

Take an example. A native was born on 3-01-1951 at 15-01 in Delhi. Major period of mercury started in his horoscope on 09-28-1992. Mercury is situated in exalted sign and posited in trine. By that time the family of the native was prosperous. The native was happy with his elder brother. Mother of the native died in Period of Mercury. He became separated from his elder brother and started business on his own. He started suffering from asthma.

It now became almost impossible for him to start his own business because Mercury became malefic being conjoined with Sun and Saturn.

### **Result: Every event has two elements:**

1. Quantitative result that is how much amount he will get.
2. Qualitative result that is benefic and malefic effects.
3. Quantitative result depends upon the strength of the planet concerned. An astrologer must keep both the elements in his mind.

Maharshi Parashar has mentioned different states to guess the ability of a planet for rendering results. Main among these are as follows:

1. Deoptadi Avastha
2. Baladi Avastha
3. Jagratadi Avastha.

## **Deoptadi Avastha**

**These are nine in number:**

1. A planet becomes Deep while posited in its sign of exaltation.
2. Swastha when it is posited in its own sign.
3. Mudita when it is posited in its friendly quarter i.e. in the sign of Atimitra.
4. Shanta when it is posited in its friendly sign i.e. Mitra Rashi.
5. Deen when it is posited the sign of a Sam i.e. neutral planet.
6. Duhkhi when it is posited in the sign of an inimical planet i.e. Shatrugrah.
7. Vikal when it is posited conjoined with a malefic planet.
8. Khal when it is posited in the sign of an Atipapagraha and
9. Kopi when it is posited situated with the Sun.
1. A planet in Deep Avastha gives benefit from ruler, power, wealth, vehicle, happiness and respect from wife and children etc. in its period/sub-period of the planet.
2. A planet in Swastha Avastha gives good health, wealth, happiness, knowledge, name, wife, vehicle, land etc. in its period-sub-period.
3. A planet situated in Mudita Avastha gives cloth, ornaments, bliss of son, wealth, vehicle etc. in its period-sub-period.
4. A planet in Shanta Avastha gives happiness, land, son, wife, vehicle and honour during its period-sub-period.
5. A planet in a Deen Avastha brings some changes in the life of a person in its period-sub-period. It also causes difference with his brothers. He might be condemned in the society and his friends may leave him. He might suffer from inferiority complex and diseases as well.
6. A planet in Duhkhavastha causes distress to the native in its period-sub-period. Loss is also caused due to theft, fire or diseases in his family.
7. A planet in Vikala Avastha makes a person suffer from inferiority complex in its period-sub-period. His friends and the members of his family may die. He suffers from loss of wife, son, vehicle, land, cloth etc.

8. A planet in Khala Avastha causes dispute in the family and bereavement due to the death of brother, mother or father of the native in its period-sub-period.
9. A planet in Kopi Avastha causes boundless sufferings to a native in its period-sub-period. The native may be deprived of wealth, land, vehicle, son, wife and his relatives may cause him distress.

### **Baladi Avastha:**

In Deeptadi states, results can be had according to the longitude of planets in signs. In a Baladi state, prediction is made according to the degrees of a planet. This state is of  $6^\circ$ - $6^\circ$ . The different states in odd signs at the degrees of planets are as follows:

- $0^\circ$  to  $6^\circ$  Balaavastha
- $6^\circ +$  to  $12^\circ$  Kumaryaavastha
- $12^\circ +$  to  $8^\circ$  Yuvavaastha
- $18^\circ +$  to  $24^\circ$  Vriddhaavastha
- $24^\circ +$  to  $30^\circ$  Mritavaastha

Similarly, in even signs it is Mritavastha if a planet is at  $0^\circ$  to  $6^\circ$ , Vriddhavastha if at  $6^\circ +$ - $12^\circ$ , Yuvavastha if at  $12^\circ +$ - $18^\circ$ , Kumaryavastha  $18^\circ +$ - $24^\circ$  and Balavastha if it is at somewhere between  $24^\circ +$ - $30^\circ$ .

A planet gives one-fourth of its result in Balaavastha, half in Kumaraavastha, full in Yuvavaastha, little in Vruddhaavastha and it gives no result if it is in Mritaavastha.

### **Jagrata Avastha:**

This state falls at  $0^\circ$  to  $10^\circ$ . In odd signs, it is Jagrataavastha from  $0^\circ$  to  $10^\circ$ , Swapnaavastha  $10^\circ +$  to  $20^\circ$  and Sushuptaavastha from  $20^\circ +$  to  $30^\circ$ .

In even signs, it is Sushuptavastha from  $0^\circ$  to  $10^\circ$ , Swapnavastha from  $10^\circ$  to  $20^\circ$  and Jagratavastha from  $20^\circ +$  to  $30^\circ$ .

A planet renders its full result in Jagratavastha and half in swapnavastha. It gives no result if it is in Sushuptavastha.

The quantitative Phal Vichar has been mentioned elaborately in Brahat Parashar Hora Shastra. Parashar has made a study of quantitative Bala of a planet on the basis of strength of planet and house (Shashtha Bal) and Shashthavargiya Bal. Here, this has to be made clear that the Bala of a planet is as important as any other Bala is. Therefore,

the quantitative Phala should be looked into by keeping the states and degrees in mind before making a prediction. It is wise to make a prediction by entering both the elements in period-sub-period.

### **Qualitative strength (Gunatmaka Bala)**

By qualitative strength (Gunatmaka bala) one can know about whether a planet will give benefic or malefic result. There are two methods for studying qualitative strength.

#### **1. Natural benefic or malefic Grahaphala.**

We know well the natural benefic or malefic planets. Jupiter, Venus, Paksha Bali Moon and Mercury conjoined with or aspected by a planet are natural benefic planets.

#### **2. Temporal benefic or malefic results.**

Every horoscope has some benefic, malefic and neutral house. Lords of benefic houses render benefic results. The lord of a malefic house gives unfavourable results. The lord of a neutral house gives result according to the planet situated in the house or according to conjunction or aspect or to its another sign. This rule is used for Vimshothari dasha whereas natural benefic and malefic are used in other periods.

Maharshi Mantreshwar has also made predictions in his "Phaladeepika" on natural benefic and malefic results of the planets before drawing out the period-sub-period. He has made prediction in his subsequent Shlokas for Vimshottari Dasha. So, here we shall first of all make a brief study of different periods of the planets according to their natural effects.

# Natural results of period of Sun

In the Major period of Sun, a native can go abroad and may dwell there. He may have benefit or loss from land, ruler, a Brahmin, fire, weapon and medicine. Interest in Yantra-Mantra grows in him. He may have friendship with the rulers, politicians and officers. He may have enmity with his relatives and he may be bereaved of wife, son or father or worried about them. He may suffer from eye, tooth and digestive problems. The Sun causes him loss of Godhana and disturbances in service.

According to Late Katawe the Major period of the Sun is basically inauspicious. But the Major period of the Sun situated in Lagna (Ascendant), fifth, tenth and twelfth houses is auspicious. The same Period of the Sun situated in rest of the house, proves to be malefic. The Sub periods of Saturn, Mars and Moon in the Major period of the Sun are malefic. The effects of the Sun situated in fiery signs prove to be inauspicious. It gives much malefic results if situated in Aries, medium or mixed in Leo but comparatively better results if situated in Sagittarius. It renders some ordinary (neither good nor bad) results if situated in earthy signs such as Taurus, Virgo and Capricorn.

The Sun situated in Airy signs (Gemini, Libra and Aquarius) gives comparatively good results whereas in watery signs it gives ordinary results. We should make prediction keeping in view the position of the Sun - whether it is exalted or debilitated, in its own house or in the house of its enemy or friend or in vargas. We should also keep in mind whether it is conjoined with or aspected by other planets. The strength of the Sun should also be noted.

### **Period prediction of the Sun situated in different houses :**

**Lagna :** If posited in lagna causes tooth and eye problems and loss of wealth. The native may have to face wrath of the rulers (Raja Koap).

**Second house:** It causes birth of a child, loss of son, dispute, loss of wife, wealth, land and vehicle.

**Third house:** The Sun in third house earns the native honour from the rulers, gives him wealth and happiness and enhances velour in him.

**In fourth house:** Loss of wife, children, friends and brothers, land, vehicle, etc. The native becomes afraid of fire, poison, weapon and thief.

**In fifth and ninth houses:** The native remains dejected. His father dies and he gets insulted in the society.

**In sixth house:** The native gets wealth from enemy but may suffer from tuberculosis, painful discharge of urine - strangury, indigestion and problems in genitals.

**In seventh house:** Wife of the native suffers from diseases and her death is also feared. He has to face hurdles in getting food and many other inconveniences.

**In eighth house:** The native might go on overseas trip. He might suffer from fever, eye and tooth problems, indigestion and other diseases.

**In ninth house:** Death of father, insult from rulers, deterioration, futile traveling, aversion from religious activities.

**In tenth house:** The native gets honour and power from the rulers and success in his undertakings.

**In eleventh house:** Renders wealth. The native can have a position. He may have interest in auspicious activities. He will remain free from diseases and will have the pleasure of conjugal life son, vehicle, land etc.

**In twelfth house:** The native can go on overseas trips. He might have loss of wealth, son, parents, land etc. and he might suffer from fear of poison, thief, fire, weapon or arms and problems in eyes and legs.

Thus we see that the Sun situated in 3rd, 6th, 10th and 11th houses gives good results. But the position as well as the conjunction of the Sun with the other planets should be kept in view. Similarly, aspects of other planets on the Sun should also be kept in mind.

The parents of a native might suffer from diseases, mental agony etc. in the period-sub-period of the Sun. He has to bear much expenses. He might have loss of cattle in the middle of the Period. He might suffer from mental agony. But he might have progress in education and prosperity during the last part of the Dhasha.

### **Sun/Sun (period 0 year, 03 month 18 days).**

The native may get honour from the rulers and gain of wealth. He might be residing in hills or in forests. However, he might suffer from bile problem and fever. Separation from father is also possible. The Sun is the Karaka of father beside being the Karaka of ruler, administration and government. The Sun gives benefic results if it is benefic (in Angle/trines, exaltation, own house, Moola trine and friendly sign). The Sun will give malefic results if it is debilitated or is situated in a debilitated sign (in sixth, eighth and twelfth houses).

### **Sun/Moon (Period 6 months)**

The native wins over his enemies. He overcomes his hardships and agonies and

gains wealth. He may earn profit from agriculture and horticulture. He may have a beautiful house. He may have opportunity to have association with his friends. Loss of wealth, mental agony and fear of water and fire is possible if the Moon is malefic.

### **Sun/Mars**

The native might suffer from diseases. Demotion in service and fear and anguish from enemy are possible. Dispute in family and protest from the members of the family and fear from rulers are also possible. He may sometimes suffer from wound and injury. There might be loss of wealth. This must be noted that the Sun and Mars become malefic if they are cruel. But both the planets give good results if they are in a benefic sign (Angle/Trine) and the native emerges victorious all over and he might have all round success and honour.

### **Sun/Rahu**

The enemies of the native may rise in revolt. Hostility is possible. Theft or loss of wealth is also possible. There might come hurdles in the way of the native. He might suffer from eye and head problems. Interest in voluptuousness is possible. The Sun is a benefic planet, but Rahu is malefic and enemy of the Sun. So the result will be like that of a king who has lost his reign and has been entrapped by his enemy.

### **Sun/Jupiter**

The enemy of the native will be ruined and will turn tails. There might be all round benefit and gain of wealth. The native will have prosperity by worshiping the deities and serving and helping Brahmins. Affection from Guru and respect from relatives are possible. Jupiter may cause ear problem, tuberculosis and asthma.

### **Sun/Saturn**

Wife of the native might suffer from diseases. Separation from son and death of any of the Gurujanas (Guru, father or uncle) are possible. There might be much expenditure and loss of wealth. Saturn is a great enemy and opponent of the Sun though it is the son of the Sun. The Sun is the king whereas Saturn is a slave. He is benefic whereas Saturn is malefic and dirt loving. The native likes to live in a dirty place during this period. He might suffer from ailments caused by disorder of the wind and bile.

### **Sun/Mercury**

Mercury is a gentle planet but the Sun is a cruel one. Therefore, the native might suffer from skin diseases, eruptions, leprosy and jaundice. Problems in digestive system and waist are possible. Ailments caused by disorder of the wind, bile and cough is also possible.

## **Sun/Ketu**

Separation from friends, difference of opinion with colleagues and the members of family, fear from enemy and loss of wealth are possible. There might be problem in head and foot. Gurujanas might suffer from diseases. Ketu is also malefic and enemy of the Sun like Rahu. Which may cause much unfavourable results.

## **Sun/Venus**

The native might suffer from problem in head, indigestion or piles. He may have loss in cultivation, land, house, food grains and pleasure of progeny. His wife and children may suffer from some diseases. Despite being a Daitya and Rajoguni (with attribute of merry - making) planet and Bhogapradayaka, Venus is also the enemy of Sun. Loss of wealth and ailments to kith and kin are very common during the Sub period of enemy.

**Note:** Despite being cruel, the Sun is not malefic. It is a benefic planet and full of energy around whom revolve all the other planets. The sun, the life-giver, is the soul of the native which changes bodies. In Sudarshana Paddhati, Janma and Chandra Lagnas have also been mentioned as important along with the Sun. So, this should be kept in mind that all his feelings and sufferings-his health, pleasure and pains, working capacity, conduct, glory and disrepute and gains and losses are influenced by the Sun. A native, influenced greatly by the Sun, makes study of soul introvert. This is why the soul gets revolutionized in the Period of the Sun that becomes benefic. The enemies of the native may rise in revolt. Hostility is possible. Theft or loss of wealth is also possible. There might come hurdles in the way of the native. He might suffer from eye and head problems. Interest in voluptuousness is possible. The Sun is a benefic planet, but Rahu is malefic and enemy of the Sun. So the result will be like that of a king who has lost his reign and has been entrapped by his enemy.

## **Chapter-4**

# **Natural results of Moon**

A native can acquire wealth, land, cloth and ornaments in the Major period of the Moon. He can have association with young women. He becomes interested in Mantra, Vedas and Brahmins. Rahu is a shadowy Planet. Our astrologers have recognised it as a planet since it puts its influence on mankind. According to some scholars Virgo is the own house of Rahu and its sign of exaltation is Gemini whereas the sign of debilitation is Sagittarius. A person, who has an exalted Rahu, will be sensual and indulged in mundane affairs. He will perform altruistic acts but only after getting his own interest fulfilled. He will not intervene in others affairs, nor will he like anyone intervene in his own.

The native, having Rahu in a malefic house (in odd house in an odd sign), will be unintelligent, knave, selfish, untrustworthy, vainglorious, fraudulent, shameless and rude. He always thinks his opinions and views to be better than those of others, He gibes and causes harm to others.

**Twelfth house:** The native remains fearful of fire, thieves and the ruler. He goes on trip to foreign land. But separation from brothers is likely.

Saturn is a malefic planet. So, its malefic influences have been explained here. But in practice (reality) it has not been noticed. Saturn makes the house exalted it is posited in. But then it has to be strong. The aspect of Saturn is malefic

## **Saturn/Saturn**

The cultivation of the native flourishes and he earns profit of it in this Period of Saturn. The number of servants and livestock (buffalo in particular) increases. The native suffers from disorder caused by excess of wind in his system. He gets monetary gain from the Shoodra class (labour or lower class). Laziness and a sense for sinful acts develop in him. He has the company of an aged woman. (Saturn is a slave in the planetary council. It is posited in the seventh house in the Natal chart of Kalpurush and hence the native will enjoy bliss of servants and maids. But it may cause diseases and laziness since it has its crooked aspect on Ascendant).

## **Saturn/Mercury**

The native lives a luxurious life and gets honour from the government. He enjoys the company of friends and wife. He suffers from disorder caused by excess of wind, bile and cough in the system. His brothers, sisters and sons suffer from diseases. (Mercury loves amusement and recreation and is the friend of Saturn. Mercury as the lord of third and sixth houses in the Natal chart of Kalapurusha is posited in sixth being twelfth house from Saturn. So, it will give pleasure of a nice bedroom and bliss of friends. The native enjoys happiness. But his brothers and sisters may suffer from diseases since the lord of their house is posited in the sixth house.

## **Saturn/Ketu**

In this Period of Saturn, the native suffers from disorder caused by excess of wind in the system. His enemy causes him distress. Difference of opinion with his wife and sons is likely and they cause him distress. Some unfortunate event is possible. He might suffer from fear of snake. (Saturn and Ketu are malefic. Ketu being posited in the ninth house is aspected by Saturn. That is why hindrances are possible).

## **Saturn/Venus**

The native gets pleasure from wife, son and friends and he gives them pleasure. He may earn in overseas trade. He earns good name and the sphere of his influence increases farther. (Lords of second and seventh houses are posited in the Natal chart of Kala Purusha). Venus is exalted in the twelfth house and is the natural signifier of seventh. So, the native will enjoy all round prosperity during this Period Sub-period.

## **Saturn/Sun**

The native remains fearful of enemy and death. Disorder in stomach or eye-problem is likely. The Period causes loss of wealth and prosperity and distress to Gurujans (elderly people). The sun is the father of Saturn, but Saturn treats him as an enemy and sees him disdainfully. So, fear from enemy and death is likely. He may suffer from diseases and loss is also possible. He may go hostile to his father.

## **Saturn/Moon**

This Period of Saturn causes diseases, loss of bliss of wife etc. The native remains fearful of death. His friends may have to suffer. He may suffer from water or airborne diseases. He may suffer a great loss caused by flood or avalanche. (Moon is mind whereas Saturn is the symbol of affliction. So, the native may have loss of peace of mind, distress and dejection. Moreover, Moon being posited in the second house and Saturn in seventh give Maraka result. Moon represents good health and Saturn is the symbol of ill-health. So, it will cause diseases and distress.

## **Saturn/Mars**

The native might be demoted or retrenched from his post. Dispute with his own dear and near ones is possible. He might suffer from fever. Fear of weapons, poison, diseases and enemies is likely. So, Saturn will definitely affect the body, age and field of work of the native adversely. Mars and Saturn are enemies, so the number of enemies may increase and distress from them is possible.)

## **Saturn/Rahu**

The native may choose an evil path. Death is possible. He may suffer from problem in urinary, Gulma etc. Injury is also possible. Saturn and Rahu both are cruel, so, this Period will cause distress. Rahu affects the mind of the native and causes him anguish. Saturn also remains happy in company of a malefic planet leaving sun, his father. It also causes agony to the native and inspires him indulge in evil acts. So, it is advised to choose the path of religion to avoid distress.

## **Saturn/Jupiter**

This is a very auspicious Sub period. A sense of devotion in relation develops in the native. He keeps on worshiping deities and Brahmins. He leads his life happily enjoying bliss of wife, son and wealth. (Saturn and Jupiter, being neutral, behave like friends. Jupiter, being the lord of ascendant in Kala Purusha, is posited in fourth house whereas Saturn being the lord of tenth house is posited in seventh. Here Jupiter is much stronger and ruins the malignity of Saturn completely. It is said that while getting aloof, Saturn renders much prosperity to the native and a sense of worshiping deities, making oblation etc. develops in him. His good deeds ruins the sins he performed. He enjoys all round prosperity by the grace of Jupiter.

**Note:** Saturn is neither malefic nor inauspicious. He is a little bit merciless and cruel and altruist like his father. The native commits sinful acts unknowingly out of greed, voluptuousness etc. Some of the sinful acts he commits prove to be fatal and cause him distress to great extent. Saturn comes to remove the turbidity and sin from the soul and mind of the native and to show him the path of virtue to have pleasure in life. It makes the native free from the evil effect of wealth and lights lamp of knowledge in his mind. It hates guile, deception and rancour and favours truth, equality and justice. So, in its period, the native gets rid of distress and agony and enjoys happiness by serving and helping the old, helpless and poor people.

## *Chapter-9*

# Natural results of period of Mercury

Mercury gives the results according to the planet it is situated with. That's why Mercury is considered to be neutral (or impotent) by some scholars. Mercury in fact represents students who follow Brahmacharya and laws of abstinence. This too hints about its impotence. But if Mercury is powerful, aspecting auspiciously and is exalted then gain of wealth, comforts and respect are there for sure. The native enjoys altruism and acquires land, clothes etc. He adopts writing and publishing as his profession. But if it is weak, subdued and bruised, the native may seek company of other women. May be at a cross with near and dear ones. Other negative aspects are troubled relation with mother and brother and brain disorder. He or she is supposedly ill - educated. He may suffer loss in business. But if it is with the Sun and is not combust then Buddhaditya Yoga takes place. In this case the native becomes a learned person or astronomer. But if it is combust, the native has mental agony and family tension. Indulgence in back biting is another feature of the native. If it is associated with an auspicious planet, all things are bright and beautiful. Name and fame come along with other worldly pleasure. Conversely, every thing goes wrong if Mercury is with an inauspicious planet. In this stage of Mercury, the native indulges in sinful acts, backbiting, tall - taking etc. Loss of land is possible and he might be deprived of bliss of wife and son. ## **Mercury/Moon**

The native may suffer from headache, cervical and eye problems, and all types of skin diseases. The planet tells of risk of life also. In fact moon is about beauty of body and health and mental peace. But as Moon and Mercury are at cross with each other, so the said ailments are likely.

## **Mercury/Mars**

This position makes life miserable. Losses are due to fire and theft. Physical ailments like eye problem and mental agony and worry are other probabilities. Loss of house and retrenchment from job are possible. Disorder caused by the excess of wind is likely. For Mars, Moon is friendly whereas Mercury is unacceptable. Mercury is a symbol of wealth and happiness. But in Sub period of Mars loss of reason and added worry are the features the native has to face. Loss of wealth is there for sure. But Mercury renders land, building and powerful post.

## **Mercury/Rahu**

This combination causes problems in stomach, head and eyes. Loss of health is also possible. The native remains fearful of fire, poison and water. He has to face loss of wealth and reputation. According to scholars, destiny depends on the base of religion and virtuous deeds. So, it is better to give up the sinful way of life and adopt one of virtue to have the auspicious results bestowed by Ketu. Ketu is the destroyer of religion and faith. It got the strong demon like Rahu beheaded right at the time of its very birth. If evident, a thing does not need any proof.

## ***Chapter–11***

# **Natural results of period of Venus**

The life of a person emerges successful if Venus is conjoined with or aspected by a benefic planet and is posited in a benefic house of his horoscope. He enjoys the company of only one woman, i.e. his wife. He stays away from women other than his wife though he happens to be sensual.

People having such a debilitated or weak Venus in their horoscope do not care for their prestige. They are indulged in illicit relations. They are playful and distrustful. They spend in intoxication what all they earn. There is no stability in whatever they do. They also remain disinterested in religious rites. So, the native may have to face separation from a Gurujan and distress caused by his relatives. He might be worried also.

This combination of Venus and the Sun causes problem in eyes, cheeks and armpits. The native suffers from fear of the state. The Gurujanas and the relatives of the native may face anguish and they may cause distress to him. The Sun and Venus are enemies of each others. The Sun is the king whereas Venus represents happiness. So, fear and distress from the king, Gurujanas (elderly people) or officials is possible. Venus is posited in the tenth house from the Sun in Natal chart of Kala Purusha. This too is a situation that might lessens the happiness.)

## **Venus/Moon**

The native may get hurt from tip to toe and in teeth. Pain is also possible. He may suffer from disorder caused by the excess of wind and bile in the system. The combination ruins the wealth of the native. He suffers from diseases like diarrhoea, tuberculosis or Gulma. (Moon is also the enemy of Venus like the Sun. Moon is the lord of fourth house (Sukhesha) of Kala Purush and Venus is the lord of the second. So, the native might suffer from different diseases. He might be worried due to loss of wealth.

## **Venus/Mars**

The native suffers from disorder caused by the excess of bile and blood problems. He acquires land and metals like gold and silver. Illicit relation with a women is possible. Hurdles will come in his way and he may change the field of work. Change of service or business is possible. Mars being lord of first house of Kala Purusha is situated in the tenth whereas Venus being lord of second is posited in twelfth house. The relation between the two is that of 3 to 11 which is said to be inauspicious. Mars helps the native acquire land but it might cause disorder in blood and blood pressure also. ## **Venus/Ketu**

This combination of Venus and Ketu will cause loss to the native. He will suffer from fear of fire and physical problems. Separation from son is possible. ## **Chapter–12**

# **Period of the lord of a house: An analysis**

Lord of the sign of the house under consideration in Natal chart is called Bhavesha i.e. lord of the house. As described earlier, a planet gives results according to the house it is posited in. Apart from this, it gives results according to the sign in which it is posited. Lastly, it gives results according to the influence of the planets it is aspected by or of the planets aspecting the dasha. In this chapter, it has been described what result of the house dasha will give in its Period Sub-period of which it is the lord or signifier.

**Period of Lagnesha:** Usually shows health, happiness and distress of the native. Physical discomfort or even death is possible in the Sub-period of the enemy of Lagna (Lord of sixth house or an inimical planet) in Period of Lagna. Lagna is related with longevity and body, therefore health gets affected.

**Second house:** Second house is related with wealth, relatives and primary education. According to another view depth of knowledge and its acquisition etc. can be inferred from Dhanbhava. The house is also a Karak (Significator) of vision and voice. Dhanesh in its own Period/Sub-period renders wealth, pleasure of own people and education. The native enjoys tasty food and is good at oration. If Dhanesh is conjoined with the Sun, native turns altruist. He becomes rich and a scholar as well. With Jupiter, Dhanesh creates an inclination towards knowledge, conscience and academics. But with Saturn it hampers education or makes ill educated.

If the Sun/Moon is weak, debilitated, conjoined with an inimical planet or posited in its enemy quarter and also aspected by Mars and Ketu then the native suffers from blindness or may even lose his sight. Such accident takes place probably during Period/Sub-period of Dhanesh. If the Moon is in sixth, the Sun in eighth, Saturn in twelfth and Mars is in second house then both the Moon and the Sun become Karaka of eye sight and create Andhatva Yoga being posited and debilitated in Trika Bhava (6, 8, 12). Similarly if a malefic Mars is posited in 2nd house and is being aspected by Saturn and Sun then eye - sight of the native falls in danger. The native loses it in most of the cases.

**Third house:** It represents brothers, sisters, courage, valour, labour, etc. It also reflects love, cooperation, helping attitude etc. of the native. But if lord of 12th house is in 3rd house of Natal chart, it will affect the 3rd house. The native gets deprived of pleasure

of siblings. Relation turns hell. He/she wouldn't look beyond own physical comforts. Lord of 3rd house also signifies ego of the native. Probably due to this reason, the native commits suicide in case the said lord is conjoined with 8th house and its lord.

Sub-period of the lord of eighth house in the Period of the lord of the 3rd may instigate the native commit suicide.

**Fourth house:** Usually reflects land, building and relation with mother and mental peace. Many learned astrologers make prediction of peace and happiness in the family welfare and friends on the basis of fourth house. This is also known as house of happiness. According to some ancient scholars, 10th house is the symbol of king and 4th of his subject. Sub-period of Moon in Chaturthesh makes one popular and gives political success. But if the fourth house is afflicted or Chaturthes is sinful then native may face consequences of treason or he might be neglected by mass. Moon is also said to be the signifier of subject/citizen.

**Fifth house:** By fifth house, different points such as progeny, retentivity, sagacity, happiness, lover and beloved (friendship) etc. are considered. Some scholars try to find out the fate (success/progress) of the father of a native by considering ninth house to be the house of father. Some others make prediction about enemies and remedies to diseases by fifth house (due to its being sixth from 12th). The same fifth house gives clue about speculation, lottery, etc. Sudden windfall (in race, lottery, speculation etc.) is likely in Period/Sub-period of the lord of 5th house if Rahu/Ketu is posited in fifth house and if the lord of fifth house is strong, conjoined with or aspected by a benefic planet. According to Shri Masin a Yokaraka planet gives wealth in its Period/Sub-period if it is conjoined with Rahu or Ketu.

**Sixth house:** By sixth house, points such as ailment, loan, enemy and struggle are considered. In its Period-Sub period, the lord of sixth house tells of fear of diseases and enemy. Unfavourable and inauspicious results are likely even in the Sub period of a planet posited in sixth from Periodnatha or in the Sub-period of a natural enemy of Periodnatha.

A native has to face much loss and distress if Sub-period Nath (planet with Sub period) happens to be the enemy of Periodnatha and Lagnesha and is situated in sixth or eighth house from Periodnatha. In short, enemy of Periodnatha, or a planet posited in sixth from Periodnatha or lord of sixth house from Lagna causes fear of disease and enemy and demotion or retrenchment from post. Even most affectionate ones and friends turn enemy.

**Seventh house:** By seventh house a consideration of marriage, business ties, foreign trip or other relations can be done. It is with this house that feature-complexion of wife/husband, character, nature, social status, time of marriage, in laws, conjugal life etc. can be forecast. Sign of Saturn or its position in or aspect on 7th house, delays marriage. But sign of Mercury (Gemini and Virgo) prompts marriage. Marriage is possible also

in Period/bhukti of the lord of 7th house, Karaka (significator) of seventh house, and in Period/Sub-period of Venus. According to some scholar, marriage is possible also in Period/Sub-period of Venus and Jupiter or in case transit Jupiter is in seventh house or conjoined with or aspected by the lord of 7th house.

**Eighth house:** 8th house tells of completeness of life, death, dishonour and gain of wealth of a dead person. Period of the lord of eighth house can cause death. According to some scholars, lord of 8th house from Lagna, Sun or Moon can spell death in its own Period/Sub-period. According to Deva Keralakar, the Period/Sub-period of the lord of eighth house can cause death in all the three Lagnas if there is Gochar Saturn also being posited in the sign of Navamsha Swami of the lord of eighth house or even aspected by it. But contrary to this if lord of eighth house is strong and conjoined with or aspected by an auspicious planet then the native will live long. If the lords of Lagna and eighth house are strong, the native will lead a long and healthy life.

**Ninth house:** Ninth house is said to be the house of fortune. In ancient scriptures it has been mentioned only as the house of religion. It is said that fortune depends on the pious deeds of a person. Profession, occupation, business and livelihood are predicted by the house of fortune. Besides, blessings from deities, luck, hopes and results according to one's qualifications are also determined on the basis of this house. The Period/Sub-period of the lord of ninth house tells of advent of good luck, promotion, wealth, status, happiness and prosperity. The lord of ninth house causes misfortune, poverty, distress and disgrace to a person if it is malefic or a malefic Sub-periodnath falls in the ninth house from Periodnatha. The native has to face slur and disrepute. The house also tells of the son or grandson and sagacity of progeny of the native.

**Tenth house:** Ancient scholars have showered unreserved praises upon this house. Saint Tulsidas has said in a couplet "Karma Pradhan Vishwa Kari Rakha, Jo Jas Karahi So Tas Fal Chakha". The implied meaning of this couplet is that the world is the field of work where one reaps what one sows. And who else could know this better than an astrological horoscope? In a horoscope, ninth house is the house of religion, 10th of duty and right after that 11th house is of gains and benefits. It appears as if there is clear declaration that welfare of people and altruism based on religious tenets render true benefits. That is the true earning of a living being who keeps wandering life after life in this universe.

As mentioned by the ancient sages, malefic planets like Sun, Mars, Saturn, Rahu and Ketu too instigate a person perform acts of social welfare (*Yajna Karma*) if they are strong and posited in tenth house (being aspected by or conjoined with a benefic planet in own or in a friendly by quarter). The native proves to be a saviour of people and provides food to them. If the lord of tenth house is benefic and aspected by or conjoined with a benefic planet, it creates a situation for the native to earn promotion, dignity, prestige and grandeur.

**Labha Sthana (Eleventh house):** Eleventh house from Lagna is known as house of gain and income. This house is also called Trishadaya (3,6,11) and considered to be malefic. It has been experienced that the Period/Sub-period of the lord of 11 th house gives auspicious result. In this Period/Sub-period gain of wealth from various sources is possible but physical and mental problem gets added up. This Period is considered to be malefic only because it causes mental tension, animosity, tension in family, loss of peace etc.

**Eleventh house:** Probably brings physical discomfort. Period/Sub-period of the lord of eleventh house causes physical problem and deterioration in health though it may give lots of wealth also. Periodnatha and Sub-period (Sub period) of the enemy of the lord of Lagna cause distress and affliction if they fall in the Period of the lord of eleventh house (Labhesha). Eleventh house is the house of death of mother (since it is eighth from fourth house). Therefore, the Period/Sub-period of the lord of eleventh house (Labhesha) can cause distress or even death to the mother. Death of the mother is possible if Gochar Saturn is conjoined or aspected in the eleventh house in the Period and Sub-period of the lord of eleventh house (Labhesha).

**Twelfth house:** By this house, things like expenses, loss, destruction etc. are considered. It is considered to be malefic because it is a part of Trik Bhava (6, 8, 12). But there is a difference of opinions. Some scholars consider it to be the house of wealth and grandeur. According to Maharshi Parashar the lords of 2nd and 12th houses are even (Sam) and so give results according to the auspicious strength (aspected or conjoined) of their other signs. The lord of twelfth house also gives result of the house it is posited in or of the planet it is conjoined with or aspected by in its Period/Sub-period.

It can be said without any hesitation that a person may lead a life full of happiness and grandeur and the sphere of prosperity gets enhanced in the Sub-period of a benefic/Yogakaraka planet in the Period of the lord of twelfth house.

A benefic planet in Gochar, being posited in twelfth house and conjoined or aspected, makes a native generous. He or she spends on religious activities, charity and altruism.

#### **Period/Sub-period of different planets in different houses:**

The Period of a planet posited in Lagna tells of physical comfort and disease-free health of a native. He becomes enthusiast, full of fervour and content. He gets wealth and grandeur also.

The Period of a planet posited in the house of wealth tells of nice food. In this Period a person may lead a happy family life with wife and sons. The Period also tells of good education and speaking skill. The sphere of wealth of the native gets enhanced. He enjoys pleasure of wealth and grandeur. Auspicious celebrations in the family are slated.

The Period of a planet in third house tells of affection of brother, courage, valour and firmness in ideas. Besides, gains of wealth, clothes, ornaments and happiness and success are also possible.

In the Period of a planet posited in fourth house, the native enjoys bliss of land, building, wealth and vehicle. He also enjoys property, good health and clothes and pleasure from relatives and friends.

In the Period of a planet situated in fifth house, the native gets land, education and honour. He enjoys a happy conjugal life with wife, sons and friends and gets cooperation from them. He also enjoys good health and becomes valorous.

The native remains fearful of the king or ruler, thieves, fire, poison or weapons in the Period of a planet posited in sixth house. He remains engrossed in constant worry due to illness and diseases, debt and litigation.

A planet posited in the seventh house creates a situation for the native to have bliss of wife, sons, wealth, vehicle etc. He may have a chance to increase his property. He gets honour from the ruler and earns a good name. There prevails happiness in his family during this Period and gets married.

Period of a planet posited in eighth house creates a troublesome and distressing situation for the native. He has to face trouble in his office. He becomes deprived of house and job. His relatives suffer much. Loss of wealth, miserable plight and distaste are also possible. A sense of repugnance may develop in him. He remains fearful of his enemies. He may earn ill-repute, disgrace and slur.

The native enjoys bliss of sons, wife, wealth, land and all round prosperity in the Period of a planet posited in ninth house.

In the Period of a planet posited in tenth house, the native gets promoted to a higher post. He gets honour and respect and bliss of wife and son also. He performs religious rites and enjoys the association of pious people.

A son child is born to the native and he enjoys the association of his wife in the Period of a planet posited in 11th house. He gets honour from the government and favour from pious people. He enjoys all round prosperity.

A planet in twelfth house makes the native inert and lazy during its Period. It causes him diseases, distress, agony, pauperism, loss and makes him extravagant and unsuccessful.

A planet posited in 6th, 8th and 12th house usually gives unfavourable results.

# **Some Rules for making prediction**

We have studied the general natural results of the planets. Following are the rules to make prediction.

1. A planet gives good results in its period-sub-period if it is situated in its own house, **own** Navamsha, in a friendly house (Mitragrahi), in an exalted sign and in its own Dreshkana (Decanate). It also gives good results if it is posited in Angle (Quadrant) and trine (Trikaona) and the lord of the sign (the lord of the house in which the planet is situated) and the lord of **Navamsha** (the lord of Navamsha sign) are conjoined with Shadbal.
2. A planet, situated in an inimical house, inimical **Novamsha** and inimical Dreshkana or in 6th, 8th or 12th house, gives unfavorable results in its PeriodntraPeriod.
3. The Period **Swami** gives favourable results in the Sub period of its friendly planets if it is benefic and strong.
4. Unfavourable result is bestowed in the Major period or Sub period of a debilitated **or** weak planet.
5. A natural malefic planet gives inauspicious result if it is posited in an inimical sign.
6. A natural **benefic** planet gives less auspicious result if it is posited in an inimical sign.
7. The result of a house, in which the planet is situated in its Ashtaka Varga, gets ruined if there are bindhu less than benefic bindu.
8. (a) Sub dashanath renders unfavourable result if it is posited in 6th, 8th or 12th house from Major dashanath  
(b) A planet gives favourable result if it is situated in Angle or trine and 2nd, and 11-th houses.  
(c) A planet gives unfavourable result if it is situated in seventh house.

9. The natural friendship between dashanath and Sub period nath should also be kept in view. For example, Saturn in Major period of the Sun or the Sun in Major period of Saturn gives unfavourable result because both are natural enemies of each other.
10. Prediction can also be made according to the order of Sub dashanath from dashanath. Order of 3, 5 and 7 gives unfavourable result. For example, Sub period of Venus in Major period of Jupiter gives unfavourable result since it is 5th from Jupiter according to the order. Sub period of Saturn in Major period of Rahu gives inauspicious result since Period of Saturn is third from Period of Rahu according to the order.
11. The Sun, Saturn, Rahu and lords of their signs (Rasheesh) and constellation and lord of Navamsha (Navamshesha) bear their influence.

The Sun, Saturn, Rahu and the lord of 12th house get the house and planet separated from Karakatva on whom they put their influence.

12. A sign house or planet always has the influence of the planet posited in the tenth house from it.
13. First, fifth and ninth houses represent Agni Tatwa (fire) in a horoscope. Second, seventh and eleventh houses represent Vayu Tatwa (air), third, sixth and tenth represent Prithvi Tatwa (Earth) whereas fourth, eighth and twelfth houses represent Jala Tatwa (water).

A planet gives result according to the element of the house it is posited in. For example, the Sun is the planet of the house representing Agni Tatwa (fire). But if it is posited in fourth, eight or twelfth house, it will give result related to Jala Tatwa (water) also.

14. The lord of a sign will give result related to the planet situated in that sign. Suppose the Sun is situated in Libra. So, Venus will give result dissimilar to that of the Sun.
15. A planet, being lord of a benefic house, cannot give good result if it is posited in or conjoined with or aspected by a malefic planet. But it does not mean that it gives unfavourable result.
16. Lords of malefic houses prove to be auspicious for the metals of their houses but inauspicious for the native if they are strong. If they are weak, they cause harm to the metals but give auspicious result to the native.

Every house has got two sides -1 .Native and 2. Metal. A malefic planet gives materials (wealth, vehicle, land, clothes etc.) if it is strong. But it keeps the native afflicted. It makes him go on trips and tours to earn money but causes him diseases and accidents. He suffers from mental disease. He remains deprived of everything if the malefic of a house is weak. But in this case he remains gratified psychologically.

### Horoscope (Lagna Kundali)

This is the horoscope of the former prime Minister of India late Indira Gandhi.

Sub-period of Venus started in the Major period of Saturn in December 1976. Saturn is the lord of seventh and eighth houses and is situated in Lagna in an inimical sign.

So, it is the enemy of Lagna. Venus is posited in sixth house. It is the lord of fourth and seventh houses. Lagnesha is the enemy of Moon. It is posited with Rahu. She was defeated in election when the Sub-period of Saturn and Venus started in her horoscope. Her colleagues left her and she was sent to jail also. Saturn and Venus are 6 to 8 from each other. Sub-period of the Sun started in January 1980. The Sun is the friend of Lagnesha and is posited in trine. So, she emerged as the prime minister again. But the lord of twelfth house is situated in the fifth. It is conjoined with the Sun, so she was bereaved of her son.

17. Sub-periodnath gives unfavorable result if it is the enemy of Periodnath or Lagnesh and is situated in a malefic house and conjoined with or aspected by a malefic planet.

So Sub-period of Mercury in Mars and Sub-period of Saturn in the Sun give unfavourable result.

18. Periodnath and Sub-periodnath give the same result that is common between the two.

Saturn is the lord of seventh and eighth houses in the horoscope of Smt. Indira Gandhi. Saturn as lord of eighth house deprives a person of power. Venus being lord of the second house from tenth makes him acquire power. Power is common between the two. So, she was deprived of power due to the combination of Saturn and Venus.

19. If Saturn and the lords of 6th, 8th and 12th houses are debilitated or combust and Lagnesh is strong, no unfavourable result is rendered in the Period of Lagnesha and in the Sub-period of Saturn and 6th, 8th and 12th houses.
20. If Periodnath is a natural benefic planet (Venus, Jupiter) and is also the lord of a fatal (Maraka) house then death is possible in the Sub-period of the lord of the eights house.
21. The lord of eighth house does not cause death even if it is fatal.
22. Rahu and Ketu do not have their own influence. They give result according to a planet they are conjoined with or aspected by. Similarly they give result according to the lord of the house they are posited in even if they are not conjoined with a planet. They also render result according to the lord of the Navamsha they are situated in.
23. A benefic planet gives result according to its strength. A natural malefic planet will not be able to cause any harm to the native if it is weak. (But it will not give him wealth as well).
24. A planet will give most unfavourable result in its period-sub-period if it is debilitated or weak.
25. A planet cannot give any result if it is posited on the junction of two houses (Bhava Sandhi).
26. The native suffers from fear of the government, thieves, fire, accident, enemies etc. if Sub-period of the lord of third, fifth, seventh, eighth or Lagna is in the Major period of a malefic planet.

## **Chapter–14**

# **Vimshottari Dasha**

Vimshottari Dasha system is based on constellation. This system is used throughout India. The system is recognised by all.

It is based on the lordship of a planet. The native can have result according to the house of which the planet is the lord. So, it is essential to know the Karakatva of the house and the merit of the lord of it.

We have studied the natural merits of the planets and the result of their period-sub-period on the basis of Karakatva. Now we shall make a study of the result of period-sub-period of different planets on the basis of the lordship of the house.

A planet gives six types of result in its period-sub-period.

Prediction on the basis of Karkatva of the houses.

According to Maharsis and scholars there are twelve parts of a horoscope. There may be any sign in a house, but the Karakatva of the house remains constant. A planet situated in a house enhances its Karakatva. But the Karkatva of a house does not change in any case. For example, the first house is said to be Tanu Bhava. It signifies the physical health of a person. It will show physical condition even if there might be any sign or a planet posited in it. So, the house has got its own importance something different from that of the other things.

### **1. Brief study of Karakatva in different houses.**

**First house/Lagna/Tanu Bhava:** The physical condition of a native is viewed by this house. The house helps study the appearance, colour, weakness, strength, physical constitution, til, massa, height, behaviour, nature, and name and fame of a native.

The house also represents heart and abdomen. It affects the back also. It also tells about creativity.

**Sixth house/Ripu Bhava/Rog Bhava:** It denotes enemy, diseases, misfortune, loss, loss of wealth, dejection, distress, sorrow, dispute, cruel deeds, addiction or besetting sin, wound or eruption, blast, fear of battle, fear of thieves; maternal uncle, Shubha Shubha situation for Mausi, dependence on step mother, cow, buffalo, camel, sen/ant, under workers, debt, hindrances, intestines stomach etc.

**Eighth house/Mrityu Bhava:** By this house we know about age, death, diseases, psychological ailment, place of death, cause of death, every aspect of death, sudden gain, dowry, money gained against insurance, gain of money in lottery, fear of enemy, discovery (Avishkar), insult, demotion in or retrenchment from service and problems in private parts of the body.

**Ninth house/Dharma Bhava/Bhagya Bhava:** This house augurs good fortune, fate, wealth and prosperity, virtue and vice, devotion, religious activities and represents monastery, temple, pond, well, teacher, devotion for teacher (Gurubhakti), Deeksha (initiation), nature, policies and modesty. It affects the calf and ankle.

**Twelfth house/Vyaya Bhava:** All sorts of expenditure are considered in this house. The house tells of the expenditure of wealth, extravagance, expenditure incurred on a pond, well, Yajna, expenditure on good or bad deeds etc. It also shows expenditure caused due to loss of health, ugliness, poverty, loss of power, diseases, hospitalisation, imprisonment, loss of vehicle, sleep, lack of sleep, hidden enemies, dispute, obstinacy etc. We also know about the expenditure on donation and offerings, sleeping room (shaiya griha), metaphysics, occult sciences, salvation, overseas trip, eye problems (particularly left eye), left foot, fingers of feet etc.

Thus the lords of the houses give result in their Sub period according to the Karakatva.

2. **Anugunaja :** Result rendered by the planet according to be posited in the house or by the association of other planets or by their aspect is called Anugunaja result of the planet or planets.
3. **Yogaja result:** Result rendered due to mutual relation of the planets is said to be Yogaja result. In Astrology there are four types of relation:
- Relationship due Exchange house:** If the planets are posited in the signs of each other is called relation with the house.
  - Relationship due to aspect:** Aspect of the planets on each other is called Drishti Sambandha.
- Suppose Saturn is posited in Aries and is aspected by Mars.
- Relationship due to house and aspect:** According to this relation a planet is posited in the sign of a planet and is aspected by that planet or aspected by a planet.
  - Relationship due to Conjunction or Aspect:** Position of planets together in a particular sign is called conjunction or aspect.

Horoscope No. 1

Mars is posited in the sign of Saturn and Saturn is in the sign of Mars. There is exchange of signs.

Mars is aspecting Saturn from fourth house whereas Saturn is aspecting Mars from tenth. This is called relation with aspect.

In horoscope No. 2, Mars is posited in the sign of Jupiter and Jupiter is aspecting it from ninth aspect. This is called Anyatar Sthana Drishti Sambandha.

The Sun, Saturn and Jupiter are posited in one house. This is called Yuti Sambandha.

Result rendered by Kendresha and lord of trine associated with each other are also called yogaja result.

4. Sahayaj Phala: Result rendered by the planets posited in Angle, Trine, Trishadaya, Triekadasha, Shadashta or Dwi-dwadash is called Sahayaj Phala.
5. Drishtij Phala: Result rendered by the planets while aspecting each other is called Drishtij Phala.
6. Mitaj: Result given by the planets posited in one single house is called Yuti/Mitaja phala.

Thus each planet gives the said 6 types of results in its Major period. But we shall study the results given by the lords of the houses in Vimshottari Dasha. So, we shall make an elaborate study of the result rendered by the lord of a planet.

## ***Chapter–15***

# **Prediction of Vimshottari Dasha**

It is essential to follow the rules ordained by Maharshi Parashar to study Vimshottari Dasha. Maharshi Parashar has classified the lords of the houses in a horoscope in the following manner.

1. Lords of trine (1,5,9) give auspicious results. Jupiter, Venus, Shukla Pakshiya (moonlit night of a lunar month) Moon and Mercury conjoined with a benefic planet are considered to be natural benefic planets whereas Saturn, Mars, Rahu, Ketu, Moon between Tithi 5 of Krishan Paksh to Awavasya (last day of a dark fortnight) and Mercury conjoined with a malefic planet are considered to be natural malefic ones. According to the Acharyas of Hora Shastra natural benefic planets give favourable result whereas natural malefic ones give unfavourable in their period and Sub-period. But the lords of trine - whether benefic or malefic planets- give favourable results.
2. Lords of 3rd, 6th and 11 th houses (Trishadaya) always give unfavourable result - in both the cases whether they are natural benefic or malefic planet.
3. (a) Natural benefic planets do not give auspicious result if they are the lords of Kendra.  
(b) Natural malefic planets do not give inauspicious result if they are the lords of Kendra.

According to the writer of Hora Shastra, as the lord of a Kendra, a planet does not give its natural benefic result. Likewise a natural malefic planet does not give its natural malefic result if it is the lord of a Kendra. But it does not mean that the benefic planets being the lords of Kendra always give inauspicious result. They do not give favourable result and become neutral. Same is the case with the natural malefic planets also. We shall now study the result given by a neutral planet in its Period and Sub-period.

4. The lords of the twelfth and second house gives neutral results. How a neutral planet gives results

a. Each planet has been allotted two signs except Sun and Moon. Therefore neutral planet gives results according to the other house it has been allotted. If the other sign is in 3rd, 6th or 11th house the neutral planet will give malefic results. If the other sign is in trine houses, it will give benefic results.

b. If the lord of twelfth or 2nd house is Sun or Moon, how they will render their results? They will give result according to the association or aspect or position (PAC). If they are conjuncted with or aspected by or posited in benefic house they will give benefic results. If they are associated or aspected by malefic planet or posited in 6th 8th or 12th house, they will give malefic results.

These rules are also applicable to the lords of kendras and 2nd & 12th house. But the signs of Jupiter and Mercury are in Kendras from each other. If the lagna is of Jupiter or Mercury sign, they become the lords of kendras. In such cases two benefic planets becomes neutral. It is called **Kendradhipati dosh**. Venus suffers from maximum effect of Kendradhipati dosha. Next comes Jupiter and then Mercury.

According to the rules one who is Lord of lagna gives benefic results and one who is lord of 7th house, maraka house gives malefic results. The lagna lord is also free from the dosha of being lord of 8th or 6th.

5. The lord of 8th house gives malefic results.

If Jupiter becomes the lord of trine (5th or 9th), it will be also lord of 6th or 8th house, malefic house. In such cases the rule is that the Jupiter being natural benefic and also the lord of benefic house, will give benefic results.

But experience says that it will become neutral and results will be decided by its position, association or aspect (PAC). In case of Saturn, it is lord of 5th & 6th or 8th and 9th or 10th & 11th, what type of results it will give? According to rules, the Saturn is a natural malefic planet and also lord of a malefic house. It will give malefic results only.

Same is the case with the Sun or the Moon posited in Cancer or Leo in its own sign. What result will the Moon or the Sun give as the lord of the second or twelfth house and is situated in any of the two houses without any other planet? The Moon or the Sun will give favourable result if it is situated in the second house in its own sign because none of them is malefic despite being the lords of second

and twelfth houses. The two planets will act as Maraka because Marakesh is formed if the Period of the two planets exists at the end of the Ayurday Khand. On the contrary, both the planets will give malefic result if they are posited in the twelfth house in their own signs. Twelfth house is also the Vyay Bhava. Some scholars call it Maraka Bhava also. The Moon is mind and the Sun is soul. Each of them is a Lagna. So, the position of any of the two in the Vyaya Bhava will be malefic for Lagna, as I suppose.

#### 5. According to the writer of Laghuparashari

"Bhagyavyayadhipatyen Randhresho Na Shubhapradah". This means that the lord of the eighth house being Vyayadheesh (i.e. 12th house) does not give auspicious result

Here too it is said that it does not give good result. It has not been said that it gives bad result. Same thing has been said about the lords of a Kendras and we have acknowledged it. So, the lord of the eighth house too should be acknowledged as a neutral planet as even Dr. B.V. Raman does. But according to some other writers of Horashastra, it is malefic since the writer of Laghuparashari has himself mentioned lord of eighth house as Rajayoga Bhangakaraka.

In practice too it has been noticed that the lord of eighth house causes trouble to the house it is posited in or to the Bhavadhipati posited in eighth house. So, we shall make prediction of Period-sub Period by considering lord of eighth house as malefic.

#### 6. If Lagnesha is the lord of 8th, it does not give malefic results. Lagnesha does not bear the inauspiciousness of lordship of eighth house. So it gives auspicious result.

Same is the case when Lagnesh is lord of 6th also as it is lord of kendra and trine it always gives benefic results.

When lagna is Libra, Venus is the lord of lagna and 8th house. Similarly, Mars and Venus are the lords of Lagna and sixth house in Scorpio and Taurus. They are Rajayoga Bhangakarak and do not bear the inauspiciousness of the lords and of eighth and sixth houses. So, they give good result.

But it has been noticed that in this situation the planets turn neutral and render result according to association and position in the house (PAC). This situation emerges due to the position of Venus and Mars in the Lagnas of Rashis. Mars is

a natural malefic planet and Venus bear the inauspiciousness most of Kendradhipati dosha. So, it is better to consider both the planets as neutral.

7. Lagna is both Kendra and Trine. So, Lagnesh lord of Kendra & trine is both Kendresha and lord of trine. It becomes Rajayogakarak.

So, Lagna gives good result particularly in its period-sub-period. That is why it does not bear the inauspiciousness of the lords of sixth and eighth houses. But according to the Jataka classics bad result is caused by the position of Lagnesha in eighth house, lord of the eighth in eighth house or Lagnesha in eighth house being the lord of eighth.

So, Lagnesha being lord of eighth house gives unfavourable result if it is posited in the first or eighth house. If it cannot render good result being posited in its own sign then how can it give good result being situated in any other house? Therefore, the students are advised to consider Lagnesha and the lord of eighth house to be neutral to have better result.

8. Jupiter and Venus give unfavourable result if they are the lords of second or seventh house.

Jupiter and Venus are natural benefic planets. They give unfavourable result if they happen to be the lords of second or seventh house. Mercury and the Moon become malefic if they are the lords of the said houses, however they are benefic. These planets do not give auspicious result in their period-sub-period. According to the Jataka authors this demerit is found only with the benefic planets. The malefic planets will become much malefic if they are the lords of a house that makes benefic planet malefic. Their period-sub-period will be very much inauspicious. According to some scholars the malefic planets do not have this demerit. But the Marakatva of the malefic planets becomes strong if they happen to be the lords of the second or the seventh house.

The Marakatva of a planet becomes powerful if it is posited in its own sign in the second or seventh houses.

9. It is better to contemplate Rahu and Ketu to be neutral.

Rahu and Ketu give result in their Sub period according to the house they are posited in or according to the lord of the house they are conjoined with. They give favourable result if they are in Trine, whereas in Trishadaya they give unfavourable result. But this result is possible only when they are not conjoined or aspected by with any other planets. They give result according to the lord of the house also with

whom they are posited. So, in this situation the prediction should be made on the basis of benefic and malefic nature of both the house and the lord of the house. They give result as a Yogakaraka planet if they are posited in a Kendra with the lord of a Trine or in a Trine with the lord of a Kendra.

Rahu and Ketu give unfavourable result if they are posited in Trishadaya with the lord of Trishadaya whereas if posited in the second or seventh house with the lord of a Kendra, they give mixed result.

Rahu and Ketu give mixed result according to the strength and weakness if they are posited in Trine with the lord of Trishadaya or in a Trishadaya with the lord of a Trine.

10. The lords or Kendra and Trine give auspicious result if they are not conjoined with the lord of any other house.

Every planet has two signs excepting the Sun and the Moon. So, their being the lord of Trikona or Kendra, the other sign might be in third or eighth house. In this situation the lord of Kendra or Trine becomes faulty. Auspicious result is likely, if the lords of Kendra, and Trine are conjoined with each other and are posited in a friendly sign, Exalted sign and a benefic house. To make it more clear, it can be said that if conjoined with each other, the strong lords of Kendra and Trine give auspicious result, even when they are not conjoined with the lord of any other house.

According to Shri Shukdeva Chaturvedi only the faulty lords of the tenth and ninth houses alone can give favourable result if they are conjoined, but not of any other lord of Kendra or lord of trine.

In nutshell Maharshi Parashar has categorised the planets into five categories.

1. Marak planets: Lords of the second and seventh houses.
2. Malefic planets: Lords of Trishadaya and eighth houses.
3. Benefic planets: Lords of Trine and Lagna.
4. Neutral planets: Lords of Kendra and second and twelfth houses.
5. Yogakaraka planets: A planet is called Yogakarak if it is the lord of both the Kendra and Trine, for example Mars in the Lagna of Cancer and Leo, Saturn in the Lagna of Libra and Taurus, Venus in the Lagna of Capricorn and Aquarius.

Which type of results will accrue during the major period of Rajayogakaraka planet and related (a) maraka planet (b) malefic planet (c) benefic planet..

Sub-period of the related Maraka planet enhances Rajayoga, though very short, during the Period of Rajayogakaraka. Sub-period of a malefic planet renders Rajayoga-though not to a great deal. But the Sub-period of the concerned benefic planet gives Rajayoga to a great extent.

12. The major period and sub-period of the Yogakaraka planets gives good result. The Antardasha and pratyantar sub periods of the benefic planets (benefic according to horoscope) give auspicious result in the major Period or Sub period of Yogakaraka planets though they are not related with them.

A Yogakaraka planet gives auspicious result if it is associated with the lord of Trine. It gives auspicious result even if it is associated with the blemished lord of Kendra but not with the lord of any other house.

13. The Yogagakaraka planets do not give Yogaja result if they are associated with the lord of the eighth house or eleventh house.

It has been said above that Yogaja result is more or less possible if the blemished lords of Kendra and Trine are conjoined with each other and lord of Kendra blemished or lord of trine becomes if its second sign falls in the third or sixth house. In this situation too the lords of Kendra and Trine give auspicious result if they are conjoined with each other and no other planet has any relationship.

It means that the other sign of Kendresha or Tikonesha does not give auspicious result if it falls in the eighth or the eleventh house.

14. A planet does not give result either favourable or unfavourable, Karaka or Maraka-in the Sub period of its own in its own Major period.

15. A planet gives result in the Sub period of the planet with which it is associated with or in the Sub period of a Sadharmi planet during the periods of related planet or his planet having the same qualities.

There are four kinds of association i.e. conjunction that have been mentioned earlier. A planet having the same qualities of some other planet is called Sahadhammi of the other, for example Kendresha-Kendresha, lord of trine-lord of trine Trishadayadhisha or the lords of the second and twelfth houses. All these planets are Sahadhammi. Likewise Lagnesha-lord of seventh house, lord of fourth house-lord of tenth house, lord of third house-lord of eleventh house, lord of ninth house-lord of fifth house, lord of sixth house-lord of eighth house - all are Sahadhammi planet.

16. Mixed result is rendered in the Sub period of a planet that is Vipareetdhammi or the planet have opposite qualities. So, it is advised to make prediction carefully.

A planet having opposite qualities other planet is called Viruddhadharni of the other, as Karaka-Maraka, benefic-malefic, Karaka-malefic. All these are Viruddhadharni of each other.

17. It is known that the Sub period of the lord of Trine gives good result if it is in or conjoined with the Major period of Kendra. Similarly, the Sub period of the lord of Kendra renders favourable result if it is associated with the Major period of the lord of Trine. But if there is no relation between the lords of the two then no auspicious result is rendered in the Major period of Kendresha and in the Sub period of lord of trine or in the Major period of lord of trine and in the Sub period of Kendresha. The Sub period of Kendresha or lord of trine does not give favourable result if there is no relation between the lords of the two.
18. The Sub period of a benefic planet, whether conjoined or not, gives favourable result if it is in the Major period of a Yogakaraka planet.

19. Rahu/Ketu posited in a benefic house (5th and 9th), give good result in the Sub period of a Yogakaraka planet whether they are conjoined with it or not.

According to some scholars Rahu/Ketu give favourable result in the Sub period of a Yogakaraka planet if they are situated in a Kendra (particularly in fourth and tenth houses) no matter, they are conjoined with some other planet or not. (A planet gives unfavourable result if it is situated in the seventh house since it is a Maraka house).

20. If the major period is of a malefic planet :

- (a) During the major period of a malefic planet and sub-period of non related benefic planet, there will be malefic results.
- (b) If the lord of sub period is related benefic planet, there will be mixed results.
- (c) An extremely unfavourable result is rendered in the Sub period of a Yogakaraka planet non-related.
- (d) A planet gives mixed results in the Sub period of a related Yogakaraka planet related. According to some scholars, favourable results are rendered in this situation.

Lord of Trishadaya and the lord of the eighth house and malefic Marakesha and Kendresh having their second signs posited in Trishadaya or in the eighth house are considered to be malefic. Trikonesh is considered to be benefic if its second sign is not posited in Trishadaya or in the eighth house.

Kendresha and lord of trine, that are conjoined with each other but not conjoined with any other planet, are considered to be the Yogakaraka planets.

- (e) Unfavourable result are rendered in the Sub period of a neutral (even) planet whether it is conjoined or not. But the result is lesser than that rendered in the Sub period of benefic/Yogakaraka planet.
  - (f) The Sub period of a malefic planet gives unfavourable result whether the planet is conjoined or not.
21. The Sub period of a benefic planet does not cause death to a native in the Major period of a Maraka planet it is related with.
- It means that only the Sub period of a malefic planet causes death in the Major period of a Maraka planet, no matter whether it is related with it or not of course. A related malefic planet causes death.
- 22. (a) Venus gives good and evil results of Saturn if its Sub period falls in the Major period of Saturn.
  - (b) Saturn gives good and evil results of Venus if its Sub period falls in the Major period of Venus. It is not important for them to be related with or be Sahadhammi. There is a natural relation between Saturn and Venus. If the sign of Saturn is as lagna i.e. Capricorn or Aquarius Venus become yogakarak. in the sign of Venus as lagna i.e. Taurus or Libra, Saturn is yogakaraka planet. So there is natural relationship between Saturn and Venus.
  - (c) The major period-sub-period gives inauspicious result if Venus and Saturn are strong.
  - (d) Auspicious result is rendered if one is strong and the other is weak.
  - (e) Both the planets, though being weak, give good result if they are the lords of 6th, 8th or 12th, or are conjoined with the lords of 6th, 8th and 12th.
  - (f) Both give good results even if one is benefic and the other malefic.
23. The following major period-sub-period also gives unfavourable results.
- (a) The major periods of the lords of constellations that are 3rd, 5th and 7th from birth star give unfavourable result.
  - (b) Major Period-sub-period of the lord of the eighth house and of the lord of the sign in which the Moon is posited.
  - (c) The Period of Saturn if it is the fourth Period i.e. the Bhogya Period of Mars.

- (d) The Mars Period if it is the fifth Period i.e. Bhogya Period of Ketu.
- (e) If Rahu Period is fifth Period i.e. Bhogya Period of Venus.
- (f) The period of a planet posited on the degree either of the beginning or of the end
- (g) The period of the lords of 6th, 8th and 12th houses.
- (h) A natural malefic planet posited in a debilitated or inimical sign or in the sixth or eleventh house (Phaldeepika) gives malefic results.
- (i) During the major period of malefic second lord & sub-period a natural malefic planet, malefic results are obtained.
- (j) If a natural malefic planet is posited in the second house and is conjoined with some other natural malefic planet then in that case, period-sub-periods of both the planets give unfavourable result. (Sarvartha Chintamani).
- (k) Marriage of a native takes place during the Sub period of the lord of the second or the seventh house.
- (l) Birth of a child takes place during the major period-sub-period of lord of trine or in Sub period lord of trine.

So, it is advised to make prediction on the basis of the good and evil results of major period-sub-period and by going through the strength of the planet on the basis of Shadbal. Shadbal shows the strength only and does not reflect the good and evil results. The results can be predicted only on the P.A.C. of the planets in the houses of a horoscope alongwith their lordship. By Shadbal, only the quantity of the strength is determined.

By it, we know as to how much wealth a native will get. But whether he will get wealth or not is determined by the results given by period-sub-period. So, to examine the major period-sub-period is also very important. Here, the results in major period-sub-period according to the Vimshottari system have been explained in brief.

Swochche Swagehe Yadi Va Trikone Varge Swakeeyetha Chatushtaye Va.

Nastangato Noshubha Drishtiyukto Janmadhipah Shyachchhubhadah Swapake.

A planet gives auspicious result in its major period-sub-period if it is situated in its exalted sign, in its own sign or Moola Trine, or in own house in Shadvarga or in Kendra or is not combusted from the Sun and is not aspected by a malefic planet.

Benefic planets posited in Trishadaya give good result during their early stage whereas

malefic ones posited in 3rd, 6th and 11th houses render bliss of wealth, wife and children during the later stage of their life.

Baladhiavastha also denotes some different stage of life and that is Baladi Avastha or Vriddhavastha according to the degrees of planets.

A weak or malefic planet gives mixed result if it becomes benefic in Navamsha Kundali. Conversely a planet situated in an exalted sign gives mixed result if it becomes weak in Navamsha Kundali.

Period of a planet heading from debilitated sign towards an exalted one happens to be auspicious whereas that of a planet coming down from an exalted sign towards debilitated becomes inauspicious as stated by the scholars.

## ***Chapter-16***

# **Prediction of Yogini Dasha**

In this age of time, a man has not much time to spare. He wants to get ahead fast as much as he can. Possibilities of accidents have grown high in this fast moving world. Life has become very much risky and its span has lessened. So, the use of Yogini Dasha has proved to be accurate more than the other systems.

According to Maharshi Parashar there are eight Yogini Dashas and their order is fixed as that of the planets in Vimshottari Dasha.

SI. No.	Yogini	Lord
1.	Mangala	Moon
2.	Pingala	Sun
3.	Dhanya	Jupiter
4.	Bhramari	Mars
5.	Bhadrika	Mercury
6.	Ulka	Saturn
7.	Siddha	Venus
8.	Sankata	Rahu

No body can save a native if he falls prey to the adverse Period of Yogini. So, it is advised to adopt the remedies prescribed against the planet concerned to save oneself from the evil effects of the Period.

### ***Yogini Dasha Sadhana***

Digit 3 should be added to the number of the constellation in which the Moon is posited at the time of birth of a native and divided by 8 thereafter. The remainder will be the Yogini Dasha.

## Cycle (Chakra) of Yogini Dasha Bodhaka

	Magala	Pingala	Dhanya	Bhramari	Bhadrka	Ulka	Siddha	Sankata
Lord	Moon	Sun	Jupiter	Mars	Mercury	Saturn	Venus	Rahu
Year	1	2	3	4	5	6	7	8
				Ashwini	Bharani	Krittika	Rohini	Mrigashira
	Ardra	Punarvasu	Pushya	Ashlesha	Magha	Poo. Fal.	U. Fal	Hast
Constel.	Chitra	Swati	Vishakha	Anuradha	Jyeshtha	Moola	P. Ash.	U. Ash.
	Shravana	Dha.	Shat.	Poo.Bha.	U. Bha.	Rewati		

The Abhijit constellation has not been given place in this cycle. The Period Varsha of these periods are 1, 2, 3, 4, 5, 6, 7 and 8 respectively. One recurrence of it is of 36 years.

The Vimshottari Dasha method is adopted to know the Bhukta Bhogya Kala of the Period. Suppose that we have to find out the Bhramari Yogini Dasha of a native. The Moon is in Ashwini constellation at  $10^\circ$

$13^\circ - 20' = 800'$  Number of years at minute = 4 yrs.

$$1 \quad " \quad " \quad " = \frac{4}{800}$$

$$10^\circ = 10 \times 60 = 600 \quad = \frac{4 \times 600}{800}$$

$$= 3 \text{ years}$$

These three years are Bhukta years and the remainder  $4-3=1$  year which is Bhogya year. Thus the native has to bear the effect of Bhramari Yogini Dasha for one more year. Take one more example. Suppose that the Chandra Spashta is  $11 R 20^\circ - 55'$ . So, the number of Moon in Rewati constellation is 27.

$$27 + 3 = 30 \div 8 = 6 \text{ (Remainder).}$$

This shows that the Ulka Yogini Dasha is going on. The measure (Man) of Rewati constellation in the sign of Pisces is 11R and from 16-40 to 30°.

Longitude of Moon (Chandra Spashta) is 11 R. 20° - 55'. So, the Moon is Bukta in Rewati constellation.

$$(11/20-55) - (11/16-40) = 4^\circ - 15' = 255 \text{ Minute}$$

Bhukta Period year = 6, if the measure  $13^\circ - 20' = 800'$

$$\begin{array}{r} 1 \\ \underline{.6} \\ 800 \end{array}$$

$$\begin{array}{r} & & 4 \times 255 \\ 255 & & \hline " & & 800 \\ . = 1.9/25 & & = 1 \text{ y.} - 1 \text{ mth} - 1 \text{ D.} \end{array}$$

Bhogya year 6 - (1-10-29)=4 year-1 Month – 1 Day.

#### Sub period Prediction

In Yogini Dasha also there are eight Sub periods like that of Vimshottari Dasha. Same rule is applied here also.

$$\begin{array}{c} \text{Dashaanatha Antardashaa Natha} \\ \hline 36 \end{array} = \text{Year}$$

Suppose, we have to find out the time of Sub period of the Sankata Yogini Dasha in the Ulka Yogini Dasha.

$$\begin{array}{r} \text{So, } \quad \underline{6 \times 8} \\ \quad \quad \quad 36 \end{array}$$

$$= 1.333 = 1 \text{ Yr. } 4 \text{ mths.}$$

A table is given below in this regard

According to some scholars of Astrology, Ashtottari Period should be used if the native is born in Shukla Paksha whereas Vimshottari Dasha should be used if he is born in Krishna Paksha. According to some others, Period begins from Krittika. But it is not accepted by all. These days almost all astrologers make prediction of Ashtottari Period by making calculation on the basis of Ardra constellation.

It is essential to use Vimshottari Dasha method to find out the Bhukta Bhogya Kala of Period. It means that it will be easy to find out the Bhukta Bhogya on Chandra Spashta.

The entire method has been explained earlier. It is suggested to keep in view the Period concerned where calculation has to be made on the basis of Period years. Asthottari Period Varsha in Ashottari Period and Yogini Dasha Varsha in Yogini Dasha should be followed. Rest of the method should be followed the same way as mentioned earlier.

Period prediction should be made according to the natural result of the planets in Yogini and Ashtottari period-sub-period. Prediction should not be made according to the result of Bhavadhipati. At the outset of the book, results of natural Period and Sub period have been mentioned. Those results should be kept in view while making prediction.
